Application:

Vinyl ether containing hydroxyl group has a good performance advantage in the industry of polycarboxylic acid superplasticizer, and its sensitivity to mud and stone powder in sand and stone aggregate is low, and its application effect in commercial concrete is better than that of traditional polycarboxylic acid superplasticizer prepared by methylallyl alcohol and 3-methyl-3-butene-1-alcohol. 2-ethylene oxyethanol can be used in the production of adhesives, lubricants, hairspray, elastomers, foams, pesticides and surface protection materials.

Package:

250kg/drum or according to customer requirements.
