---

**Product name: 2,5-Furandimethanol**

**CAS: 1883-75-6**

**Molecular weight: 128.13**

Item	Standard
Appearance	Sandybrown powder
Purity (%)	≧ 98.0
Moisture(%)	≧ 0.5
Melting Point (°C)	74-77 °C
Boiling Point (°C)	275 °C

### **Application:**

As a raw material, 2, 5-furandimethanol can be used to synthesize drug intermediates, nucleoside derivatives, crown ether and furan, etc., and can also be used as a solvent, softener, wetting agent, binder, surfactant, synthetic plasticizer, etc. Secondly, it can be used as a monomer to synthesize polyester, polyurethane and other polymeric materials to reduce the content of volatile organic compounds in clothing coatings. 2, 5-furandimethanol is expected to completely or partially replace propylene glycol in coating materials; In addition, 2, 5-furandimethanol itself can also be used as an artificial receptor in molecular recognition studies.

### **Package:**

25kg/drum or according to customer requirements.

Unilong Industry
