

Technical data sheet of Butylated Hydroxytoluene

Product	Butylated Hydroxytoluene
Chemical Name	BHT (BAGS), BUTYLATEDHYDROXYTOLUENE
CAS	128-37-0
Chemical Formula	C ₁₅ H ₂₄ O
Molecular Weight	220.35
EINECS Number	204-881-4
Molecular structure	

SPECIFICATION (FCC 12):

ITEM	STANDARD LIMITS
Appearance	White crystal powder
Initial Melting Point	≥69.0°C
Free Phenol	≤0.015
Burning Residue	≤0.010
Water Content	≤0.050

Packaging:

25kgs sealed polyethylene bags.

Application:

- 1) As a food additive, it can effectively delay the rancidity of food;
- 2) In the petroleum industry, it is an excellent antioxidant for various lubricants, secondary processing gasoline, paraffin and other mineral oils;
- 3) Food grade plastics, polymer materials for food packaging, antioxidants and stabilizers for white or light colored products of natural rubber and synthetic rubber

Shelf Life:

2 years in original packaging containers.
