Application:

Collagen is mainly used as a scaffold material, skin, and bone in tissue engineering. With the application of collagen in tissue engineering, the use of bioengineered membranes has become more widespread, such as vascular membranes, heart valves, and ligaments. Collagen has the functions of pure natural moisturizing, whitening, freckle removal, wrinkle prevention, etc., and can be widely used in the cosmetics industry. Nowadays, many cosmetics sold in the market, such as facial mask, eye cream, skin cream, etc., contain collagen.
