Contact: +86-18653132120

Product name: Diisooctyl phthalate

CAS: 27554-26-3

Molecular wight:390.56

Item	Standard
Melting point	-4°C
Boiling point	435.74°C (rough estimate)
Density	0.983 g/mL at 25 °C(lit.)
Vapor pressure	1 mm Hg (200 °C)
Refractive index	n ₂₀ /D 1.486(lit.)
Fp	>230 °F

Application:

Diisooctyl phthalate has similar physical and chemical properties to benzoate, and it is mainly used as an organic solvent and plasticizer in the polymer material industry in chemical production. Plasticizer (plasticizer) is a polymer material additive, plasticizer added to the polymer material, without changing its basic chemical properties, reduce its melt viscosity, glass transition temperature and elastic touch, so as to improve its processability, and improve the product's softness and tensile properties of the substance.

Package:

Usually packed in 180kg/drum, and also can be do customized package.
