Application:

Iminodiacetic acid is an intermediate of herbicide glyphosate, used in pesticides, rubber and carboxylic complexes, and is widely used as a raw material for glyphosate. As a complexing agent, Iminodiacetic acid is also used in organic synthesis. Iminodiacetic acid is used for the synthesis of glyphosate, and is also used as a synthetic raw material of amino acid chelate resin, and is also an important raw material and intermediate of rubber and electroplating industry, and is also used as an intermediate of surfactant and complexing agent. Preparation of complexing agent and surfactant, organic synthesis.

Package:

25kg/bag or according to customer requirements.
