

TECHNICAL DATA SHEET

Product	Isobornyl methacrylate
Chemical Name	2-methyl-,1,7,7-trimethylbicyclo(2.2.1)hept-2-ylester,exo-2-propenoicaci; IBOMA
CAS	7534-94-3
Chemical Formula	C ₁₄ H ₂₂ O ₂
Molecular Weight	222.33
EINECS Number	231-403-1
Molecular structure	

SPECIFICATION:

ITEM	STANDARD LIMITS
Appearance	Colorless or pale yellow liquid
Purity	≥98.50%
Chroma	≤50
Acidity	≤1.0%
Water	≤0.2%
Polymerization inhibitor (PPM)	≤300

Packaging:

25kgs drum/ 200kgs drum/ IBC drum or pack as customer needs.

Application:

- 1) Widely used hydrophobic monomer, which has a good combination of hardness and flexibility, and can improve the chemical resistance and water resistance of the polymer system.
- 2) Mitiglinide Calcium intermediate

Shelf Life:

2 years in original packaging containers.
