Application:

Isononyl alcohol (INA) is mainly used to produce high molecular weight phthalate plasticizers such as diisononyl phthalate (DINP). With the gradual acceptance of DINP safety in the market, DINP Chemicalbook, as an environmentally friendly substitute for low relative molecular weight phthalate plasticizers such as dioctyl phthalate (DOP), has seen rapid growth in demand and is widely used in automotive, cable, floor, construction and other industrial fields.

Package:

25kg/drum
