

Technical Data Sheet

Product Name:2-Bromoisobutyryl Bromide

CAS:20769-85-1

Molecular Formula:C₄H₆Br₂O

Molecular Weight:229.9

Appearance: Transparent to yellow liquid

Technical Indicators:

ITEM	STANDARD
Appearance	Transparent to yellow liquid
Assay	99% min
Boiling point	162-164° C
Flashpoint	103 °C
Refractive index	1.507-1.509
Density	1.86

Application:

2-Bromoisobutyryl Bromide CAS 20769-85-1 can be used as a brominating agent or acyl chloride reagent in organic synthesis reactions.

Packaging:

200L/drum, customized according to customer needs.

Storage & Transportation:

Store at low temperature and avoid light.
