

Technical Data Sheet

Product Name: Myristyl Dimethylamine Oxide

CAS:3332-27-2

Molecular Formula:C16H35NO

Molecular Weight:257.46

Appearance:Light yellow liquid

Technical Indicators:

ITEM	STANDARD
Appearance	Light yellow liquid
Density	0.716
Water solubility	409.5g/L
Assay	≥30.0%
PH	5-9

Application:Myristyl Dimethylamine Oxide is an amine compound with surface active properties. Myristyl Dimethylamine Oxide has excellent surface activity properties and can reduce the surface tension of liquids. Myristyl Dimethylamine Oxide is soluble in water and organic solvents, and can form stable emulsions, dispersions, and liquid colloids

Packaging:25KG/DRUM,200KG/DRUM

Storage & Transportation:Myristyl Dimethylamine Oxide should be stored in a clean, dry and cool place, preventing from sunlight, rain.
